Emerald – the official Partner of the Castle's Gardens

In the 2020 season, Emerald helps to maintain the quality of lawns and plants in the Royal Gardens. Emerald is a passion for historical gardens, parks and sports facilities, based on working in harmony with nature. Selected lawn grass seeds, organic fertilizers, specialized equipment for the preparation and care of green areas are a guarantee of beauty and health,

gushing like water from a spring. We create the Castle's green enclave and a great place for rest, taking into account the principles of ecology and sustainable development. Innovative products contain natural active substances, incl. humic acids, trichoderma and zeolite. Emeraldl is a comprehensive range of solutions and products aimed at private users and professionals.
